

Refugees in the Near East (UNRWA).

UNWRA says its funding has stagnated for close to a decade and that constant shortfalls have stretched it to the limit.

The Emirates cut funding from \$51.8 million to \$1 million in 2020, and Britain halved its support from \$57.2 million in 2020 to \$28 million in 2021.

SENIORS GET FOURTH JOB

An Israeli decision to give a fourth vaccine to citizens aged 60 and older began with a bang, with thousands vaccinating on the first day of the campaign and 50,000 scheduling a shot. According to study of the Sheba Medical Center, the fourth vaccine boosts antibodies fivefold within one week.

Meanwhile, omicron increasingly exponentially, with 10,000 new cases reported on Monday — the highest number in four months — compared to 3,000 a week earlier and 1,300 a week before that. Serious cases were increasing at a slower pace to 117 on Tuesday morning, up from 85 a week earlier.

The R rate (showing how many new cases each patient generates on average) was 1.88 for light cases but only 1.1 for the seriously ill.

Prime Minister Bennett warned of a coming “storm,” and government advisor Professor Eran Segal opined that the infection will only begin to decline in three weeks, when one in four Israelis is infected.

In a worst-case scenario, the Gertner Institute for Epidemiology and Health Policy Research believed that 99% of the population

could get infected, with serious cases of Covid reaching 2,750 in number.

As the flu and Covid began to overwhelm hospitals, Health Minister Nitzan Horowitz threatened that his Meretz party would stop voting with the coalition unless the government heeded his plea to add 110 ICU beds and 10 ECMO machines to the health system.

QUARANTINE PROCEDURES LIGHTENED

Israel imposed new stringencies to combat infection while simultaneously lightening quarantine procedures to prevent freezing Israel's economy.

Among other things, vaccinated or recovered travelers from orange countries now only need to quarantine for one day instead of three.

With tens of thousands crowding into testing sites throughout Israel, the government was considering using less accurate antigen tests in many situations, instead of more effective PCR tests.

ISRAEL MAY OPEN DOORS TO AMERICANS

Israel plans to admit foreigners from orange countries next week, subject to proof that they are vaccinated or recovered from Covid, together with PCR testing and quarantines.

Although the US, UK, UAE, Ethiopia, Tanzania, Mexico, Switzerland, and Turkey were still on Israel's red list, Ilana Gans, head

of the Public Health Department, said this might not be for long.

“The assessment is that this list will empty next week, because the model is relative and we are looking at the ratio [of other countries] compared to the morbidity in Israel, and also the extent of disease coming in from abroad versus the rest of the verified morbidity [in Israel],” she said.

As the morbidity entering Israel from abroad becomes less significant, “for us, there is no epidemiological justification for pursuing a policy of restrictions,” she said.

Officials had not yet implemented the decision of a Knesset committee to widen the circle of relatives allowed from red countries for life-cycle events such as weddings and funerals to include siblings, grandparents, or grandchildren. So far, only parents could apply to an exemptions committee to travel in either direction.

Although the Immigration Authority implemented a decision allowing dual-citizenship Israelis to travel to red countries where they earn their livelihood, people complained that the exceptions committee was still turning down people in this category due to confusion and lack of consistency.

Due to the dearth of international flights, the Finance Ministry is to pump tens of millions of dollars into the El Al company to help it survive.

NEW COVID MEDICINES

Israel has become one of the first countries in the world to receive a shipment of Pfizer's oral Covid medicine meant for pa-

tients in mild to moderate condition. Taken within the first three days of symptoms, it reduces the chances of severe disease and death by 89%.

Israel also authorized the import of Lagevrio (Molnupiravir), an anti-viral tablet produced by the US-based MSD pharmaceutical company. Effective against mild to moderate illness, the drug prevents the virus from replicating by creating errors in its genetic code.

Israel's Oravax Medical company pre-sold 10 million doses of the vaccine it is developing to Vietnam-based Tan Thanh Holdings Investment Joint Stock Company.

ARMY HELICOPTER CRASHES OFF HAIFA

Two IDF pilots died in a helicopter crash near Haifa, and an aerial observer accompanying them was moderately hurt.

The two victims, 38-year-old Lieutenant Colonel Erez Sachiani and 27-year-old Major Chen Fogel, met their deaths during a routine training flight when their Eurocopter AS565 Panther suddenly disappeared from a control screen back at base and plunged into the sea in front of shocked people on the coast.

Rescue teams recovered the survivor and bodies a mile and a half from the shore.

All helicopters of the crashed model have been grounded and all helicopter training flights canceled until the reason for the crash is determined.

**ILAN HIGH SCHOOL SEEKS
FULL TIME SCIENCE TEACHER
FOR 2022-2023 SCHOOL YEAR**

Ilan High School is a college preparatory girls' yeshiva high school located in Monmouth County, NJ.

Classes are tracked and teachers and students benefit from small teacher to student ratio. The individual hired will teach three sections of high school science, Biology (9), chemistry (10) and AP Bio or AP Chem(11). The individual will work closely with principal and other members of the faculty to implement Common Core State Standards in the science curriculum.

Candidates for the position must have a minimum of three years teaching experience. Excellent compensation.
