

ground incursion to Gaza at the end of October.

A senior official from South Korea's Joint Chiefs of Staff said, " Hamas is believed to be directly or indirectly linked to North Korea in various areas, such as the weapons trade, tactical guidance, and training."

As an extension of its long-standing security partnership with Iran and Syria, North Korean military technology has reached Hamas, Lebanon's Hezbollah, and Yemen's Houthi rebels, the Center said.

North Korea describes Israel as an "imperialist satellite state" and recognizes Palestinian sovereignty over the entirety of Israeli territory except the Golan Heights.

North Korea's links to Palestinian terrorist groups weakened

after the end of the Cold War, only to revive after the Gaza Disengagement from Israel when Hamas appealed for military assistance during Operation Protective Edge in 2014.

UNPRECEDENTED:
ISRAEL
APPROVES
CULTURED BEEF

For the first time globally, meat cultured from cattle cells was approved for consumption by Israel's Ministry of Health. Aleph Farms is set to sell laboratory-grown "Black Angus Petit Steak" later this year.

Dr. Ziva Chamama, Director of the Risk Management Department in Food at the Ministry of

Health, stated: "This approval makes Israel the first country in the world to approve cattle cell cultures as food, leading globally in this field while maintaining public health."

Although Singapore and the U.S. have approved cultured chicken, Israel is the first to approve cultured beef.

In a psak on cultured meat, Chief Rabbi Rav Dovid Lau wrote that its permissiveness depends on the specific production process.

SOLDIER'S
HEADSTONE
REMOVED

The family of the soldier Ron Sherman, kidnapped by Hamas

on October 7, accused the Defense Ministry of sending a worker to remove a headstone that criticized the government for its part in his death. Its epitaph read, "Kidnapped, abandoned, and sacrificed in Gaza by the government of failure in the disaster of October 7."

Maayan, the soldier's mother, replaced the stone with another bearing a similar message.

ISRAEL
SHORT OF
AMMUNITION

Maj. Gen. (res.) Giora Eiland, who previously served in various senior roles within the Israeli security establishment, said that Israel has had to be economical in

using ammunition in Gaza during the last few weeks due to a shortage of reserves.

Reasons for the shortage included a decision of former Chief of Staff Aviv Kochavi to allocate resources to other areas within the military rather than stockpile heavy ammunition.

Another reason for the ammunition shortage was that Israel transferred a significant amount of American ammunition to Ukraine at the request of the United States.

Furthermore, Eiland said, the military used an excessive amount of various types of munitions without careful consideration in the early stage of the war.

He also mentioned the need to maintain reserves for the larger theater in the north, as Israel faces a potential conflict with Lebanon.
